CAREER SUMMARY

Software engineer with 6+ years of experience in embedded systems and industrial automation, specializing in C/C++ development and hardware–software integration. Experienced in system design, real-time concepts, and exposure to CAN/LIN communication. Also skilled in modern web technologies for end-to-end solution development. Committed to delivering reliable, high-quality systems.

PROFESSIONAL SKILLS

- **Programming:** C/C++ (6+ yrs), C#, Java, Python, JavaScript/TypeScript, HTML/CSS
- **Backend & Frameworks:** FastAPI, Spring Boot, .NET (C#, WPF), Node.js, RESTful APIs, GraphQL
- **Frontend:** React, Tailwind CSS
- **Embedded & Systems:** Embedded Systems, hardware–software integration, real-time systems, system design, CAN/LIN (exposure), TCP/IP
- **Cloud Platforms:** AWS, Microsoft Azure, Supabase (BaaS), serverless architectures
- **Databases:** MySQL, SQL Server, PostgreSQL, SQLite, relational database design
- **Operating Systems:** Linux (Ubuntu), QNX, Windows Embedded
- **Software Engineering:** Requirements analysis, debugging, maintenance, documentation, Agile delivery
- **Testing & Quality:** gMock, JUnit, MISRA C++, ASPICE, CMMI, Doxygen
- **Version Control & Collaboration:** Git, SVN, Jira, Redmine
- **AI & Applied AI:** Experience integrating AI services using OpenAI API, building AI agents and prompt-based systems; basic computer vision and image processing (OpenCV, scikit-learn)
- **Tools:** Visual Studio, VS Code, Kanzi Studio, MFC, Postman, Wireshark, Astah, WinSCP, CMake, GDB
- **Data Formats:** JSON, XML, PPS (automotive signal/configuration format)

COURSES & CERTIFICATIONS

AWS Academy Cloud Developing – AWS Academy	May 2025
AWS Academy Cloud Foundations – AWS Academy	Mar 2024
The Ultimate React Course 2024 – Udemy	Jun 2024
Web Developer Bootcamp with Flask and Python – Udemy	Jan 2024
Australia Industry Experience Program – Practera	Nov 2023

EDUCATION

Bachelor of Computer Science – University of Wollongong, Australia	Jul 2023 - Jun 2026
Diploma in Software Engineer – FPT APTECH, Ha Noi, Viet Nam	Jul 2014 - Jul 2016

WORK HISTORY

Live Fit Nutrition

May 2024 – May 2026

Software & Operations Engineer (Part-time) (Wollongong, Australia)

- Developed and maintained e-commerce features using React, TypeScript, and Shopify
 - Supported order fulfillment, including packing, dispatching, and stocktake
 - Managed order data and store content to support daily operations
-

Toshiba Software Development Vietnam (TSDV)

Oct 2018 - Jun 2023

Software Engineer (Full-time) (Ha Noi, Viet Nam)

GMV2 (Ticket Vending Machine System)

Customer: Shibaura Mechatronics

- Developed and maintained embedded software for ticket vending machines using C/C++ for hardware control (e.g., coin handling and return system)
- Built UI and controller components using C# (WPF) for user interaction and system management
- Improved system stability, reliability, and user experience through feature enhancements and debugging

TFC (Semiconductor / Industrial Automation Systems)

Customer: Shibaura Mechatronics, TSMC, Sony

- Developed and enhanced software for semiconductor and automation systems using MFC C/C++ and Python
 - Implemented machine communication features using SECS protocol for bonding chip machines
 - Designed and optimized algorithms for electric dam pump scheduling, improving operational efficiency
-

FPT Software

Oct 2016 - Oct 2018

Software Engineer (Full-time) (Ha Noi, Viet Nam)

A1 Platform (Automotive HMI System)

Customer: Panasonic, Suzuki

- Developed HMI features using MFC and C/C++ for a reusable platform supporting multiple vehicle models
- Delivered scalable and user-focused interfaces, improving consistency across different car systems

GM Cluster (Automotive Instrument Cluster System)

Customer: LG, General Motors, Lexus

- Developed HMI features using Qt, Kanzi Studio, and C/C++ for automotive instrument cluster applications
 - Integrated vehicle signals and system data into HMI by working with CAN/LIN-based communication through middleware layers
 - Supported features involving vehicle status and connectivity (e.g., signal handling, Bluetooth-related data), ensuring reliable real-time display
-

AWARDS AND HONORS

Outstanding Achievement Award – UOW College, Australia

Jul 2024
