CAREER SUMMARY

Motivated software engineer with strong experience across embedded systems, industrial automation, and modern AI/web technologies. Passionate about building reliable, user-focused solutions, continuously learning new technologies, and delivering high-quality results through practical problem-solving and collaboration.

PROFESSIONAL SKILLS

- **Programming & Web:** C/C++, C#, Java, Python, JavaScript/TypeScript, HTML/CSS, React, Tailwind CSS
- **Cloud Platforms:** AWS, Microsoft Azure, Supabase (BaaS)
- **Databases:** MySQL, SQL Server, PostgreSQL, SQLite
- **Software Engineering:** Requirements analysis, system design, debugging, maintenance, documentation, Agile delivery
- **Testing & Quality:** gMock, JUnit, MISRA, Doxygen, CMMI, ASPICE
- **Version Control & Collaboration:** Git, SVN, JIRA, Redmine
- **AI & Computer Vision:** scikit-learn, OpenCV, computer vision fundamentals, ML integration
- **Tools & IDEs:** Visual Studio, VS Code, IntelliJ IDEA, Eclipse, NetBeans, Kanzi Studio, MFC, Postman, Wireshark, Astah, WinSCP, etc...

COURSES & CERTIFICATIONS

AWS Academy Cloud Developing – AWS Academy	May 2025
AWS Academy Cloud Foundations – AWS Academy	Mar 2024
The Ultimate React Course 2024 – Udemy	Jun 2024
Web Developer Bootcamp with Flask and Python – Udemy	Jan 2024
Australia Industry Experience Program – Practera	Nov 2023

EDUCATION

Bachelor's in computer science – University of Wollongong, Australia	Jul 2024 - Jun 2026
Diploma of Information Technology – UOW College, Australia (WAM: 89/100)	Jul 2023 - Jul 2024
Diploma in Software Engineer – FPT University, Ha Noi, Viet Nam	Jul 2014 - Jul 2016

WORK HISTORY

Bachelor of Computer Science - University of Wollongong	Jul 2023 – Present
• Participated in team-based university projects across core computer science subjects, delivering full-stack applications using JavaScript, TypeScript, React, and Node.js. • Developed backend services with Java and Node.js, including RESTful and GraphQL APIs as part of subject assessments. • Designed and implemented databases using SQL, PostgreSQL, and MySQL for coursework and group projects. • Applied cloud technologies on AWS and Azure for deployment, storage, and application integration in selected subjects and capstone-style projects.	

- Completed subject-based projects involving AI, machine learning, and computer vision, using Python, scikit-learn, and OpenCV.
- Gained experience with software engineering fundamentals including teamwork, Git version control, documentation, and agile-style project delivery.

Toshiba Software Development Vietnam – Ha Noi (Viet Nam), Software Engineer Oct 2018 - Jun 2023

- Developed and enhanced software solutions for industrial and automation systems using C/C++, C#, and Python.
- Built recognition and SECS communication features for bonding chip machines; optimized electric dam pump scheduling using algorithmic approaches.
- Maintained and upgraded ticket vending machine software, improving stability, features, and user experience.
- Worked in Agile teams, contributing to design, coding, testing, debugging, and delivery of production-ready systems.

FPT Software – Ha Noi (Viet Nam), Software Engineer Oct 2016 - Oct 2018

- Developed HMI features for automotive systems using C/C++, delivering reliable and user-focused software.
- Collaborated with international clients including LG, Suzuki, GM, and Lexus to understand requirements and deliver quality solutions.
- Worked closely with customers throughout the design, development, testing, and maintenance phases of software delivery.

AWARDS AND HONORS

Outstanding Achievement Award – UOW College, Australia

Jul 2024
